

Thermowell

For sanitary applications

Model TW22

WIKA data sheet TW 95.22

Applications

- Sanitary applications
- Food and beverage industry
- Bio and pharmaceutical industry, production of active ingredients

Special features

- Materials and surface finish quality in accordance with the standards of hygienic design
- Fully welded
- Can be combined with models TR21-A and TR22-A electrical resistance thermometers, measuring insert exchangeable
- Can be combined with mechanical thermometers, resistance thermometers and DiwiTherm®

Description

The model TW22 thermowell is used to adapt thermometers and measuring inserts to the process and protects the sensor against harsh process conditions. The thermowell is mounted to a weld-in nozzle equipped with a respective hygienic connection and is built in pipelines and tanks.

Through the rotatable threaded connection, the connection head or display can be loosened and adjusted to the desired position.

With a combination of a model TR21-A or TR22-A resistance thermometer, the connection head is removable along with the measuring insert. This enables the thermometer to be calibrated along with the complete measuring chain, i.e. without disconnecting the electrical connections. In addition, this avoids having to open the process, and thus the risk of contamination is minimised.

Specifications

Nominal width

see tables of dimensions

Pressure ratings PN

see tables of dimensions

Material

Wetted parts: stainless steel 1.4435 (316L, UNS S31603)

Surface roughness of wetted parts

Standard: $R_a < 0.76 \mu\text{m}$ (SF3 per ASME BPE)

Option: $R_a < 0.38 \mu\text{m}$ (SF4 per ASME BPE)

$R_a < 0.38 \mu\text{m}$ electropolished (SF4 per ASME BPE)

Connection to thermometer

In combination with:

- Resistance thermometer model TR21-A
 - G 3/8" fixed

- Resistance thermometer model TR22-A
 - M24 x 1.5 male nut, rotatable
 - Option: 1/2 NPT, fixed

- Mechanical thermometers models 55 and 73 design 3 (union nut), DiwiTherm® model TR75
 - M24 x 1.5 male nut, rotatable
 - Option: Mechanical thermometers with design S (fixed), design 2 (rotatable threaded connection), design 4 (compression fitting), design 5 (union nut and loose threaded connection): G 1/2 female or 1/2 NPT female

Thermowell diameter

- For resistance thermometers models TR21-A and TR22-A
 - Ø 6 mm for Ø 3 mm sensors
 - Ø 6 mm tapered to Ø 4.5 mm for Ø 3 mm sensors (quick responding)
 - Ø 4.5 mm for Ø 3 mm sensors (quick responding, only insertion length $U_1 \leq 25 \text{ mm}$)

- For mechanical thermometers models 55 and 73, DiwiTherm® model TR75
 - Ø 8 x 0.9 mm for Ø 6 mm sensors
 - Ø 12 x 1.5 mm for Ø 8 mm sensors

Neck tube length M

85 mm

Other neck tube lengths on request

Neck tube diameter

- Resistance thermometer model TR22-A
 - up to DN 20: 9 mm (except per DIN 11851 (milk thread fitting): 12 mm)
 - from DN 25: 12 mm

- Mechanical thermometers models 55 and 73, DiwiTherm® model TR75
 - same diameter as the thermowell diameter

Insertion length U_1

25, 50, 75, 100, 150, 200 mm

Option: up to 400 mm according to customer specification

Insertion lengths for BioControl® flow-through housing: see table "Dimensions for NEUMO BioControl® process connection"

Sealing combination (option)

The transition from the connection head to the thermowell is effected via an optional sealing combination (polyurethane) of flat gasket and wiper. This combination permanently prevents the penetration and depositing of humidity and impurities in this area (IP68). Additionally, the sealing combination simplifies the cleaning process significantly.

In combination with the patented BVS head and the cable gland in hygienic design, it delivers an easy-to-clean and hygienic measuring point, even in those areas not in contact with the product. The BVS head is designed in such a way that cleaning agents can run off easily and that no residues can accumulate on the case.

Thermowell with tapered tip (option)

The thermowell can be designed with a tapered tip for an optimised response time. The massive shaft takes on the mechanical loads. Through the mass reduction at the sensor tip, the heat transfer to the sensor element is considerably improved. This shortens the response time of the measurement assembly. The minimum insertion length must thus be taken into account.

Thermowells with a tapered tip are favoured in media with poor heat transfer and are particularly recommended with gases.

Approvals

Logo	Description	Country
	EAC (option) Pressure equipment directive	Eurasian Economic Community
	3-A (Option) ¹⁾ Sanitary Standard	USA
	EHEDG (Option) ¹⁾ Hygienic Equipment Design	European Community

Patents, property rights

Case with easily cleanable twist crown, integrated into the case cap (GM 000984349)

- 1) Confirmation of 3-A or EHEDG conformity only valid with separately selectable 2.2 test report
- 2) In combination with
 - ASEPTO-STAR k-flex upgrade gaskets from Kieselmann GmbH, Germany or

Combination possibilities

- Resistance thermometers models TR21-A or TR22-A
- Mechanical thermometers models 55 or 73
- DiwiTherm® model TR75

Combination examples

VARIVENT® and VARINLINE® are registered trademarks of the company GEA Tüchenhagen.
BioControl® is a registered trademark of the company NEUMO.

Calculating the insertion length of the thermometer

Mechanical thermometers models 55 and 73

- Design 2
 $L_1 = U_1 (TW22) + M - 25 \text{ mm}$
- Design 3
 $L_1 = U_1 (TW22) + M - 5 \text{ mm}$

DiwiTherm® model TR75

$$A(I_1) \text{ or } A(U_2) = U_1 (TW22) + M (TW22) - 15 \text{ mm}$$

Resistance thermometer model TR21-A

$$L_1 = U_1^{1)} + M^{2)}$$

Resistance thermometer model TR22-A

$$\text{Sensor length } l_5 = U_1^{1)} + M^{3)} + 10 \text{ mm}$$

- 1) Through their small design, face-sensitive measuring resistors serve to reduce the heat dissipation with short insertion lengths. Available for the temperature range up to 150 °C (302 °F).
For thermowell insertion lengths of less than 50 mm, face-sensitive measuring resistors are recommended.
For thermowell insertion lengths of less than 11 mm, face-sensitive measuring resistors are generally used.
- 2) Neck tube length M see data sheet TE 60.26 (TR21-A)
3) Neck tube length M see data sheet TW 95.22 (TR22-A)

Legend:

- M Neck tube length

NEUMO BioControl® process connection

U_1 = variable insertion length

For fitting into a flow-through housing, the insertion length U_1 and the thermowell diameter must be matched. For angular housings, the insertion length U_1 must be specified by the customer.

The cases are not part of the scope of delivery of the resistance thermometers and can be ordered as a separate item. For a detailed description of the BioControl® cases, see data sheet AC 09.14.

Compression fitting process connection

Ball-type compression fitting

Collar-type compression fitting

Process connection, smooth, $\phi 6$ mm, basic shape for compression fitting

Welding ball process connection

3) When using the optimal wiper the available insertion length is reduced by 12 mm.

4) In order to meet the 3-A standard, the weld seam must be finished with a minimum radius of 3.2 mm on the product side. In this way, no weld defects, such as recesses or gaps, remain.
